OTCnet Release 1.2.3 Notes

January 2012

Overview

OTCnet Release 1.2.3 primarily contains a system upgrade to expand Java Runtime Environment compatibility to version 1.6.0_24 and improve system performance. This release includes several backend modifications that will not directly impact users.

Java Development and Runtime Environment

OTCnet Online and Offline application is upgraded to support:

- ▶ Java Development and Runtime Environment 1.6.0_24 programs
- ▶ 1.6.0_24 Java plug-in when accessed through Internet Explorer
- ▶ OTCnet online is upgraded to receive and process transactions from OTCnet Offline versions using Java Runtime Environment 1.6.0_24

Please note: Java 1.6.0_20 is still compatible with OTCnet and an upgrade to Java 1.6.0_24 is not required.

Technology Upgrade

Updates have been made to improve OTCnet software infrastructure and performance. The following technology component was upgraded:

- Web FOCUS 7.6.10 Hotfix 14 for reporting
